Multiple Unit plans : Level 1 or level 2 coverage plans for multiple home owners (such as landlords) with per unit discounts.

OUR MOTIVES!

Have you noticed that fuel-service companies always try to get more out of you? Because they deliver your fuel they pressure you into one scheme or another until you feel there is no choice but to have them do it all. This allows their ulterior motives to kick in. After all, Why would a fuel provider want to save you money on your costs of their fuel? The answer is, They Don't!

Our motives are simple, maintain your HVAC system so it runs better, keeps you more comfortable and saves on fuel and electric costs.

Imagine being able to stop your fuel providers automatic delivery because you still have more than enough to run all winter! Or, showing your neighbors that while their electric bill sky rocketed because of summer's cooling cost your bill dropped a third from last year!

IT CAN HAPPEN..... AND WE CAN HELP!

A BETTER WAY OF LIVING!

ENERGY PRICES ON THE RISE!!!

There is a headline we have all seen. And lately, we've seen it too much. Did you know that there is a company on Delmarva that exists solely to defend the consumer from rising energy costs?

US Energy Efficiency Group LLC (U.S.E.E.G.), is opening it's services to the eastern shore. Currently offering HVAC services, and talking to people about ways to save on those big bills. We've designed this brochure to give you a brief overview of some of the ways U.S.E.E.G. can help keep you from repeatedly digging into your wallet to pay for comfort in your own home.

Our HVAC service plans are uniquely competitive with some of the "LARGER Fuel companies". How can we do this? The answer is simple. We don't try to get you to purchase your fuel (oil, propane, kerosene, or natural gas) from us. Keep any provider you choose. We simply offer to maintain your existing HVAC systems in an attempt to make them more efficient. This saves you from paying them more!

WHAT IF I NEED NEW EQUIPMENT?

If you need new equipment we will be happy to obtain it for you. We will gladly find the best equipment for your needs and will aid you in the transition of install. We can install several kinds of new equipment and will gladly take the time to see that you are given an education on the recommended operating procedures, and maintenance requirements for any equipment we install.

WHAT CAN WE OFFER YOU?

U.S.E.E.G., is currently offering competitive service contracts on heat pumps, air conditioning, oil fired furnaces, natural gas or propane furnaces, and boilers.

Compared to some of the "LARGER" companies in the area that want you to sign up for a labor coverage plan, a parts coverage plan, and/or a specific equipment service plan; we at U.S.E.E.G. take the guess work and confusion out of the plans we offer and provide you with one all inclusive plan for what ever system you want to maintain.

CONTRACT VS NON-CONTACT

Not sure if you want to enter into a contracted service agreement? NO PROBLEM! We will gladly take you on an as needed call basis. Call us for a non-contract clean and service, We will evaluate your system and you can evaluate our service. We will sit down with you to weigh the benefits of our contracted agreements based on your systems requirements, and if you still aren't sure, we won't push you. You are welcome to do business with us with or without a long-term obligation.
